Eleven-year-old Fern doesn't have the easiest life. Her stepfather is out of work, and she's responsible for putting dinner on the table--not to mention keeping her wild younger brothers out of trouble. The woods near their home is her only refuge, where she finds food and plays with her neighbor's dog. But when a fracking company rolls into town, her special grove could be ripped away, and no one else seems to care. Her stepfather needs the money that a job with the frackers could bring to their family, and her wealthy grandfather likes the business it brings to their town. Even her best friend doesn't understand what the land means to Fern. With no one on her side, how can she save the forest that has protected her for so long? The acclaimed author of *Wonder at the Edge of the World* weaves a poignant story about life on the poverty line, the environment, friendship and family--and, most of all, finding your place in the world.

The Effects of Pre-reading Strategies on the Comprehension of Culturally Unfamiliar Texts for Adolescent [sic] English Language Learners Kristie O'Brien 2007 This study examined the effectiveness of two pre-reading strategies on the building of sociocultural background knowledge for comprehending culturally unfamiliar texts as well as helping ELLs make active links between old and new knowledge. Seven adolescent English Language Learners (ELLs) with little background in Christianity participated in the one-week study. Each student read and took a quiz on four different reading passages based on common stories from the New Testament. The first and final reading passage and quiz pairs were not accompanied by a reading lesson, the second pair was accompanied by a K-W-L chart lesson, and the third pair was accompanied by an anticipation guide lesson. The results of the quiz scores were compared and the final results of the study suggest that although K-W-L charts aid comprehension for ELLs more than anticipation guides, both strategies are effective.

The Pedagogy of Confidence Yvette Jackson 2015-04-24 In her new book, prominent professional developer Yvette Jackson focuses on students' strengths, rather than their weaknesses, to reinvigorate educators to inspire learning and high intellectual performance. Through the lens of educational psychology and historical reforms, Jackson responds to the faltering motivation and confidence of educators in terms of its effects on closing the achievement gap.

The author seeks to rekindle the belief in the vast capacity of underachieving urban students, and offers strategies to help educators inspire intellectual performance. Jackson proposes that a paradigm shift towards a focus on strengths will reinvigorate educators passion for teaching and belief in their ability to raise the intellectual achievement of their students. Jackson addresses how educators can systematically support the development of motivation, reflective and cognitive skills, and high performance when standards and assessments are predisposed to non-conceptual methods. Furthermore, she examines challenges and offers strategies for dealing with cultural disconnects, the influence of new technologies, and language preferences of students.
