**A Hole in the Head** Charles G. Gross 2012-01-13 Essays on great figures and important issues, advances and blind alleys—from trepanation to the discovery of grandmother cells—in the history of brain sciences. Neuroscientist Charles Gross has been interested in the history of his field since his days as an undergraduate. A Hole in the Head is the second collection of essays in which he illuminates the study of the brain with fascinating episodes from the past. This volume's tales range from the history of trepanation (drilling a hole in the skull) to neurosurgery as painted by Hieronymus Bosch to the discovery that bats navigate using echolocation. The emphasis is on blind alleys and errors as well as triumphs and discoveries, with ancient practices connected to recent developments and controversies. Gross first reaches back into the beginnings of neuroscience, then takes up the interaction of art and neuroscience, exploring, among other things, Rembrandt's "Anatomy Lesson" paintings, and finally, examines discoveries by scientists whose work was scorned in their own time but proven correct in later eras.

**Suggestions to Medical Authors and A.M.A. Style Book** American Medical Association 1919

**Amazing Grace in the Life of William Wilberforce (Foreword by Jonathan Aitken)** John Piper 2007-01-09 "John Piper's succinct and superbly perceptible study of William Wilberforce deserves to become an acclaimed bestseller. It not only tells the story of a great man's life-it also tells us how to understand the ultimate source of his greatness and happiness. Moreover, that understanding goes far deeper than the abolitionist achievements for which Wilberforce is honored, astounding though they were. William Wilberforce's secret, as revealed in this book, was that he made the journey from self-centeredness, achievement-centeredness, and political-centeredness to God-centeredness. And he made it with Christlike joy." -Jonathan Aitken Against great obstacles William Wilberforce, an evangelical Christian and a member of Parliament, fought for the abolition of the African slave trade and against slavery itself until they were both illegal in the British Empire. Many are aware of Wilberforce's role in bringing an end to slavery in Great Britain, but few have taken the time to examine the beliefs and motivations that spurred him on

for decades. In this concise volume, John Piper tells the story of how Wilberforce was transformed from an unbelieving, young politician into a radically God-centered Christian, and how his deep spirituality helped to change the moral outlook of a nation. As world leaders debate over how to deal with a host of social justice and humanitarian crises, a closer look at Wilberforce's life and faith serves as an encouragement and example to all believers.

**Capitalism at the Crossroads** Stuart L. Hart 2010-06-15 Today's era of economic crisis has sent a powerful message: The age of "mercenary" capitalism is ending. We must finally embark on a new age of sustainable, stakeholder-based capitalism. While enlightened executives and policymakers understand the critical need for change, few have tangible plans for making it happen. In *Capitalism at the Crossroads: Next Generation Business Strategies for a Post-Crisis World*, Third Edition, Stuart L. Hart presents new strategies for identifying sustainable products, technologies, and business models that will drive urgently needed growth and help solve social and environmental problems at the same time. Drawing on his experience consulting with top companies and NGOs worldwide, Hart shows how to craft your optimal sustainability strategy and overcome the limitations of traditional "greening" approaches. In this edition, he presents new and updated case studies from the United States and around the world, demonstrating what's working and what isn't. He also guides business leaders in building an organizational "infrastructure for sustainability"--one that can survive budgeting and boardrooms, recharging innovation and growth throughout your enterprise. Discover: · The new business case for pursuing sustainable capitalism · Sustainability strategies that go far beyond environmental sensitivity · How to fully embed your enterprise in the local context--and why you should · Tactics for making long-term sustainability work in a short-term world

**Walking to Listen** Andrew Forsthoefel 2017-03-07 A memoir of one young man's coming of age on a journey across America--told through the stories of the people of all ages, races, and inclinations he meets along the way. Life is fast, and I've found it's easy to confuse the miraculous for the mundane, so I'm slowing down, way down, in order to give my full presence to the extraordinary that infuses each moment and resides in every one of us. At 23, Andrew Forsthoefel headed out the back door of his home in Chadds Ford, Pennsylvania, with a backpack, an audio recorder, his copies of Whitman and Rilke, and a sign that read "Walking to Listen." He had just graduated from Middlebury College and was ready to begin his adult life, but he didn't know how. So he decided to take a cross-country quest for guidance, one where everyone he met would be his guide. In the year that followed, he faced an Appalachian winter and a Mojave summer. He met beasts inside: fear, loneliness, doubt. But he also encountered incredible kindness from strangers. Thousands shared their stories with him, sometimes confiding their prejudices, too. Often he didn't know how to respond. How to find unity in diversity? How to stay connected, even as fear works to tear us apart? He listened for answers to these questions, and to the existential questions every human must face, and began to find that the answer might be in listening itself. Ultimately, it's the stories of others living all along the roads of America that carry this journey and sing out in a hopeful, heartfelt book about how a life is made, and how our nation defines itself on the most human level.

cancer-related checkup is recommended every 3 years for people aged 20 to 40 and every year for people aged 40 or older. This exam should include health counseling and, depending on a person's age and gender, might include examinations for cancers of the thyroid, oral cavity, skin, lymph nodes, testes, or ovaries, as well as for some nonmalignant diseases. A high dietary intake of vitamin C has been shown to significantly reduce the risk of death from heart attacks and strokes, as well as all other causes including cancer. Many clinical and experimental studies have clearly demonstrated that stress, personality, attitude, and emotion are etiologic or contributory in suppressing the immune system as well as leading to the development of many diverse diseases. Regular exercise has been demonstrated to provide benefit to individuals with immunodeficiency diseases, particularly through stress alleviation and mood enhancement. HIV-positive individuals had increases in CD4, CD8, and natural killer (NK) cells immediately following aerobic exercise. Melatonin exerts significant anticancer effects, especially against breast cancer. Vitamin E not only improves insulin action, it also exerts a number of beneficial effects when taken at dosages ranging from 400 to 800 IU, which may aid in preventing the long-term complications of diabetes. Find out all of this and more in The Encyclopedia of Natural Medicine!
