Iran Homa Katouzian 2013-06-01 World-renowned Iranian expert Homa Katouzian presents the first comprehensive introduction to one of the world’s most controversial and misunderstood countries Since the 1979 revolution, Iran has been locked in conflict with the United States and Europe. Personified in the West by a series of bogeymen from Ayatollah Khomeini to Mahmoud Ahmadinejad, this villainous mask obscures a far more complex identity, forged by a vibrant and chaotic history. Revealing the country’s true face, acclaimed expert Homa Katouzian delves deep into Iran’s past, exploring how an ancient civilization at a crossroads of diverse dynasties and religions grew to become an ethnically, linguistically, and culturally rich nation. Centuries of arbitrary rule and revolution – from the first Persian empires to the Green Movement – are brought to life as Katouzian offers fresh insight into this fascinating country. Asking where its future may lie post–Arab Spring, this is the perfect primer for understanding a country characterized by constant flux and controversy.

Hamas Transformation Ibrahim Naili 2015-10-28 This book examines the political development and transformation of Hamas from a resistance movement into a political authority in the Gaza Strip, as a result of the group's victory in the Palestinian national elections of 2006. From a political science and conflict transformation perspective, it focuses on the political opportunities, challenges and process of environmental and structural change which led the resistance movement to evolve from an underground militant group to a force in conventional politics. This study offers an analysis of Hamas' formation, development, political and strategic transformation, and the organisational structure shifts required by the transition. Through the adoption of a peace studies perspective, Hamas Transformation: Opportunities and Challenges also explores the political changes made by Hamas, including the structural alterations that took place within Palestinian society in the Gaza Strip as a result of the group's transition into political authority. This transition occurred despite the military takeover of the Gaza Strip by Hamas in 2007, and the Israeli military operations in 2009, 2012 and 2014. Additionally, the book also examines the new dimensions and phases of Hamas' political development after its victories in the elections, Palestinian division and the setbacks of the Arab Spring. Offering a range of views regarding the experiences of Hamas in governance, the book concludes with an in-depth illustration of Hamas' mixed strategy and tactics of governance and resistance.

Joy For Beginners Erica Bauermeister 2011-06-09 From national bestselling author of Reese Witherspoon's Book Club pick *The Scent Keeper* comes a beautifully crafted novel about erica to experience true joy, starting one small step at a time. Having survived a life-threatening illness, Kate celebrates by gathering with six close friends. At an intimate outdoor dinner on a warm September evening, the women challenge Kate to start her new lease on life by going white-water rafting down the Grand Canyon with her daughter. But Kate is reluctant to take the risk. That is, until her friend Marion proposes a pact: if Kate will face the rapids, each woman will do one thing in the next year that scares her. Kate agrees, with one provision—she didn't get to choose her challenge, so she gets to choose theirs. Whether it's learning to let go of the past or getting a tattoo, each woman's story interweaves with the others, forming a seamless portrait of the power of female friendships. "Joy for Beginners takes us on the emotional journeys of seven women seeking to transform their lives, and proves that sometimes what we really need to inspire us to change is a good, firm shove."—Garth Stein, author of *The Art of Racing in the Rain*

Red Green's Beginner's Guide to Women Red Green 2013-09-17 Red Green is celebrated as one of the handiest men in North America. But as well as being a purveyor of inventive practical advice on, for example, making a jetpack from two propane tanks, a hybrid car from recycled golf carts and satellite dishes, and a kiddie ride from a bar stool attached to the agitator of a washing machine, Red Green is also noted for his insights into that most difficult of assembly jobs, human relationships. His previous bestselling tome, *How to Do Everything*, showed Red dipping his toe into the self-help genre with such items as "How to make dinner more romantic" and "The easy way to raise children." Now Red Green -- a veteran husband (of Bernice), father, soul-searcher, philosopher and observer -- has devoted an entire book to sharing with other battle-weary and confused males all he has learned about the differences between the sexes. Set out in approximately chronological order, from teen dating to the last words of men ("You know, honey, in the last couple of years, you've really packed on the beef"), this is the testosterone owner's manual to every aspect of finding a mate and then learning to deal with her growing disappointment in you. The man who has already shared such morsels as "If you can't be handsome, be handy" and "Quando omni flunkus morituti" ("When all else fails, play dead") here presents a PhD in life-lessons about the most vexing problem facing mankind today, or any day: women.

Rifts in Time and in the Self Cheryl Dueck 2004 The fall of the Berlin Wall in November 1989 marked the end of East Germany's socialist regime and a new beginning for a unified German Federal Republic. Cultural historians agree that the event caused one of the deepest rifts in time and thinking seen by an entire

generation of Germans--a rift that left its mark on the psyche of every citizen, challenging notions of the personal and the political, and crashing traditional understandings of the individual and the collective self. In this bold rethinking of the question, Cheryl Dueck goes beyond the social, political, and psychological discourses that Marx and Freud, Foucault and Lacan viewed as the initiators of modern (socialist) identities to explore the literature and discourse of the quest for unity of the female subject. Reading such authors as Christa Wolf, Brigitte Reimann, Helga Königsdorf, and Helga Schubert, Dueck traces the striking fissures which run through time and through the female self, haunting women within the socialist project. The book shows how two generations of women writers have struggled consciously and systematically in their letters, aesthetic writings, and literary production to create a new language to express their own sense of self within a restrictive socialist and patriarchal system. Rifts in Time and in the Self offers an unprecedented look at the reconceptualizations of the female subject during several phases of GDR history, and women writers' persistent attempt to carve out spaces of identity and community.

Rift Peter Cole 1989 Poetry. In its sharp ear for everyday speech and fascination with the realms that lie beneath the surface of ordinary reality, the lyric poetry of Peter Cole elegantly carries forward a powerful American tradition that merges the visionary with the immediacy of direct experience--a lineage carried from Emily Dickinson and W.C. Williams into the broad possibilities of the present. In the long poems and lyrics of this collection, a poignant vision emerges--of Jerusalem, the Bible, Jewish liturgical writing, and of the secular mystery hidden in the Hebrew tradition. Originally published in a special artist's edition, the much acclaimed RIFT presents an original voice of the highest intensity.

Adventure Games Aaron A. Reed 2020-02-20 The genre of adventure games is frequently overlooked. Lacking the constantly-evolving graphics and graphic violence of their counterparts in first-person and third-person shooters or role-playing games, they are often marketed to and beloved by players outside of mainstream game communities. While often forgotten by both the industry and academia, adventure games have had (and continue to have) a surprisingly wide influence on contemporary games, in categories including walking simulators, hidden object games, visual novels, and bestselling titles from companies like Telltale and Campo Santo. In this examination of heirs to the genre's legacy, the authors examine the genre from multiple perspectives, connecting technical analysis with critical commentary and social context. This will be the first book to consider this important genre from a comprehensive and transdisciplinary perspective. Drawing upon methods from platform studies, software studies, media studies, and literary studies, they reveal the genre's ludic and narrative origins and patterns, where character (and the player's embodiment of a character) is essential to the experience of play and the choices within a game. A deep structural analysis of adventure games also uncovers an unsteady balance between sometimes contradictory elements of story, exploration, and puzzles: with different games and creators employing a multitude of different solutions to resolving this tension.

Mission Rift David E. Woolverton 2021-07-06 There are two types of conflict in congregations: conflict that kills and conflict that cultivates growth. So argues David E. Woolverton in *Mission Rift: Leading through Church Conflict*. Conflict that kills--that damages or destroys teams, ministries, missions, vibrancy--occurs when we as the people of God forget who we are, why we're here, and where we're going in carrying out the divine mission. Conflict that cultivates growth often begins with the same scenarios, but leaders see conflict as a context for learning how to live together as a people called to transform their neighborhoods, schools, and workplaces. In *Mission Rift*, Woolverton reorients our view of congregational conflict. In part 1, he examines conflict from a theological and ecclesiological framework, exploring why it is essential to discipleship and mission. In part 2, he presents six principles of missional leadership, challenging pastors and other leaders to define themselves within the frameworks of spiritual formation and family systems, and then to create environments that facilitate growth in faith communities. Rather than resolve conflict too quickly, Woolverton explains, lest we inadvertently sabotage the potential it has to draw a congregation toward spiritual growth, wise leaders recognize that a lack of conflict may be a symptom of mission decline, rather than congregational unity. When the church pursues its divine mission first, conflict may become essential for defining its mission priorities. Successfully leading through conflict toward a transformative end will empower a congregation's witness within its community and beyond.

Reforming Law Reform Michael Tilbury 2014-01-01 As a special administrative region of China, Hong Kong has its own legal system rooted in the common law. Reforms to this system take into account Hong Kong's unique conditions as an international city and draw widely on practices around the world. Since 1980, recommendations from a Law Reform Commission, chaired by the Secretary for Justice, have resulted in comprehensive revisions in key areas of law, ranging from commercial arbitration and interception of communications to divorce and copyright. Recently, however, the government has been slow to act on the Commission's recommendations. Questions have also arisen about whether the Commission -- under-resourced, part-time and government-led -- can really meet the needs of an increasingly sophisticated society. Is law reform itself also in need of reform? This collection of essays by distinguished experts from around the world seeks answers to the question. The book explores the varied experience of law reform in Hong Kong and other common law jurisdictions and makes recommendations for strengthening the process of law reform both in Hong Kong and elsewhere. Michael Tilbury is Kerry Holdings Professor in Private Law in the Faculty of Law, the University of Hong Kong. Simon N. M. Young is a professor in the Faculty of Law, the University of Hong Kong and was formerly Director of the Centre for Comparative and Public Law. Ludwig Ng is a partner in ONC Lawyers, Hong Kong. "This important book should be a wake-up call to lawmakers in Hong Kong and beyond on the urgent need for effective law reform. It is especially important for Hong Kong whose competitive advantage is being harmed by institutional paralysis and official lethargy. The editors' modest recommendations deserve urgent action by Hong Kong's governors to bring up to date its archaic and outmoded legislation." --Lord Lester of Herne Hill, QC "Law reform is essential, especially in these fast-changing times. The law reform agency plays an important role in this process. This work examines the experience of the agency in Hong Kong and elsewhere and discusses how its effectiveness can be enhanced. This valuable contribution deserves to be read." --The Hon. Andrew Li, Chief Justice of Hong Kong, 1997–2010 "This is probably the first collection in Hong Kong of writings on law reform, examining clinically how law reform is, and can be processed with reference to other law reform institutions, in the pursuit of effectively meeting the often shifting needs of society and economy. Important chapters on reform of different areas of law are also included in this book. The editors and contributors are to be congratulated for masterminding such an admirable source of information and inspirational ideas." --Stephen Kai-yin Wong, Barrister, Secretary of the Law Reform Commission of Hong Kong "In this collection of essays the learned editors--Tilbury, Young and Ng--have drawn together an outstanding group of authors, representing many years of experience in law reform across the common law world. From the UK, Canada, Australia and Hong Kong, the insights of the authors are both reflective and forward-looking, providing a rich resource towards 'reforming law reform.'" --Professor Rosalind Croucher, President, Australian Law Reform Commission *Starfinder* DK 2013-10-21 Starfinder lays out the universe clearly, highlighting the signposts in the sky and explaining the cosmology of the stars. The Rift V. Y. Mudimbe 1993 The Rift explores textuality, writing, solitude, and death in the context of contemporary African life, and at the same time examines the constitution and materiality of African subjectivity. V. Y. Mudimbe's writing is provocative, demanding, and distinctly modernist. In its compelling exploration of the production of African knowledge within or outside the interstices of imperial space, The Rift contributes significantly to contemporary debates about the liminal subject split - to use Homi Bhabha's phrase - "between the here and the there" - and most important, about issues of power and post-colonial epistemology.

League of Legends Mid Lane Mastery St Petr 2016-12-02 As a Master Tier player on both EUW and EUNE servers that cares deeply about the state of League of Legends, I had enough of the lack of high quality educational material about the game. So about a year ago, I used my experience as a real life teacher and high elo player and wrote what turned out to be the best selling ebook about improving at League of Legends on Amazon for Season 6 - 30 Days to Diamond. By the way - an improved, enriched and even more detailed version for Season 7 is out and it's called 21 Days to Diamond and Beyond. Ever since the book delivered on the results it promised, I've received dozens of requests from players asking me to write separate, very detailed books about the roles of ADC, Mid lane, Top lane and Jungle that would be adapted for Season 7. Due to the support I got from my dear readers, I felt motivated to roll up my sleeves and produce the best of my work as a results-oriented League of Legends coach. After countless hours of hard work, I am proud to announce that each of the books people wanted me to write is now available to anyone that is open to learning and is willing to get to that next level as a player in their favorite role. So why is League of Legends Mid Lane Mastery worth your time? If you are still paying attention, I am assuming you are an ambitious, competitive person with a winner's mindset that is interested in acquiring all the necessary game knowledge that will help you improve massively as a Mid lane main. Here is a list of the contributions that this book will make towards your current level of game knowledge: - You will learn what the Mid laner's role and responsibilities are, and there are a lot of specific instructions on what you can do to develop each quality, especially towards the end of the chapter. This includes map awareness, leadership, shot calling and more. - You will learn how to model your champion pool for Mid lane (yes, there is a best way to do it) and how to overcome the disadvantages of facing lane counters. - You will learn the optimal Runes and Masteries setup for each popular Mid laner. - You will learn the intricacies of what you can do to acquire outstanding farming skills. - You will learn the wave management techniques for Mid lane which will help you build a massive advantage over your opponent. - You will learn all you need to know about vision control, which includes the best warding spots for Mid lane on both sides. - You will learn the various ways in which you can influence your Jungler to gank for you more often and give you the Blue Buff every time. - You will learn all you need to know about dominating your trades and how to trade against short-ranged, medium-ranged and long-ranged opponents. - You will learn multiple other principles to dominating the Mid lane (refer to the table of contents). - You will learn the various approaches you should use to extend your advantage and carry your games to victory. - You will also learn all the details you need on how to play when you are behind in lane. - Lastly, you will learn the practical steps that you can take to cultivate an unstoppable winner's attitude that will also help you have more fun with the game. - There also are a lot of general game knowledge golden nuggets thrown all throughout the book to help you in your journey further. Music Ivan Hewett 2003-01-01 The word 'music' in the early 21st century means many things. It means Mozart in the elevator, 50s pop songs on TV adverts, Finnish folk songs on Nokia 'phones. It means inflammatory Serbian nationalist song, ancient Coptic Church chant, Berlin electronica, Wynton Marsalis. Given this bewildering

abundance, how we can speak of a single thing called 'music'? This book will argue that we can.
